ABOUT

- Bryanna is a San Diego-based tarot reader and astrologer who left the corporate world to pursue spirituality and intuitive healing full-time. Raised in a close-knit immigrant family outside Detroit, Bryanna's mother is from the Philippines and her father is from Malta.
- After graduating from Michigan State University and building a career in advertising in Chicago, Bryanna says astrology and tarot completely changed the way she understood herself and her relationships.
- Bryanna says she first became fascinated with tarot and astrology as a teenager, but kept her interests private because spirituality felt "weird" or misunderstood growing up. She believes astrology helped her heal emotionally, reconnect with herself, and eventually discover her true purpose through birth chart readings and intuitive work.
- Now a proud "corporate dropout," Bryanna runs her business full-time through private readings, workshops, events, parties, and tarot experiences across Southern California.
- Bryanna blends astrology birth chart analysis with intuitive channeling, often receiving highly specific details and messages before she even pulls tarot cards. Known for her strong eye contact, grounded energy, and sharp intuition, Bryanna says she loves skeptical clients and specializes in "cold readings" with little to no information.
- Deeply competitive and driven, Bryanna says her Aries Moon pushes her to constantly improve herself, making the show the perfect mix of spiritual connection, growth, and competition.
